EECS 647 INTRODUCTION TO DATABASE SYSTEMS, FALL 2014

Project Report –KU ONLINE TUTOR SELECTION
SERVICE

Instructor:Prof. Bo Luo

Submitted By
DODDALA MAHITHA
KUID: 2787070

INTRODUCTION

The Main purpose of this project is to assign Tutors online for the University of Kansas students who need mentoring in Particular departments.

The Main Objectives of this project are:

- 1) “To get assigned a real Tutor anytime, anywhere with this online tutor selection website”.
- 2) It connect students to a Professional tutor online who provides on demand homework help and tutoring services in Math, Physics, Chemistry and Biology etc.
- 3) It provides a Platform between Students and Tutors from all over the University.
- 4) When a Student selects a Particular Department from the dropdown list, he will be directed to a page where the student will be asked to enter the course for which they want tutoring for, then all the tutors who are capable of Mentoring that course will be shown.

Student is free to select Tutor of his own choice. At least a confirmation page will be displayed with student name, Department, Course and the assigned Tutor.

METHODOLOGY

The Project will be implemented using Iterative (Agile) Methodology, wherein the Basic functionality will be created first and then tested for maximum possible use cases. After the basic functionality is achieved, further improvements and customizations will be added and tested.

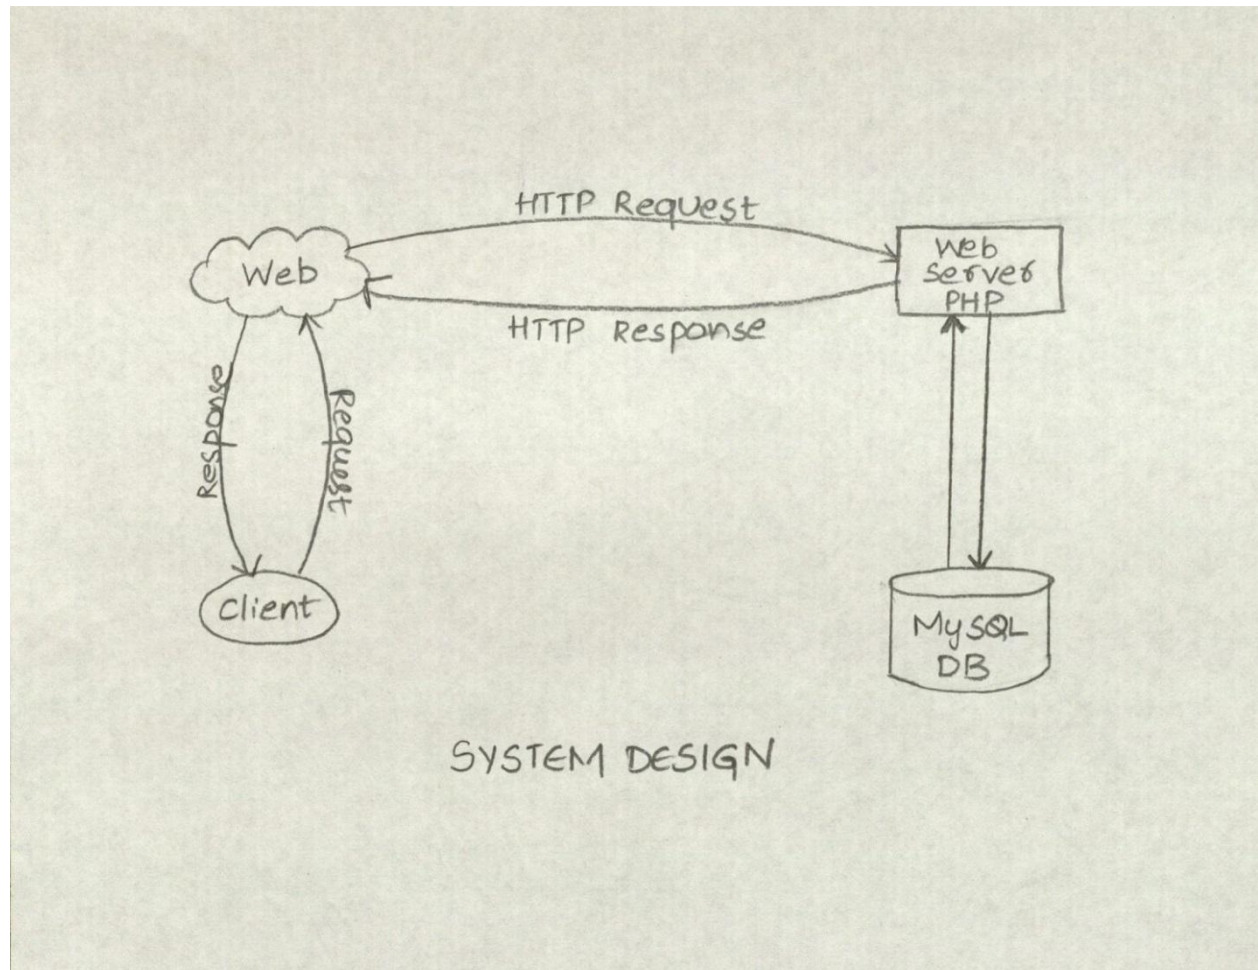

BACKGROUND FOR THE PROJECT (INSPIRATION)

Online Tutor websites like www.tutor.com and www.tutorvista.com are the well-known websites in providing Professional tutors and also a guaranteed grade for the students. They offer tutors who went through a rigorous screening process with subject exams, mock tutoring sessions, mentor review and third-party background check. Every tutor is skilled at tutoring in their online classroom and helping students understand concepts through a shared whiteboard, chat and file-sharing.

The features provided by these Websites are very rich and Exhaustive, the Main idea behind this Project is to come up with a similar website that provides the basic selection functionality of Online tutoring services, with provisions for adding additional features later on.

SYSTEM DESIGN

Below is the basic system design, where a user(Client) sends a request (requesting for a Tutor) through Internet, the request is received by the web server, it is processed and the Web server connects to the database and does the required operation and formulates a response and sends it back to the user. Finally the User will be assigned a Tutor along with Tutor's Information like his Experience, Phone, and Address.

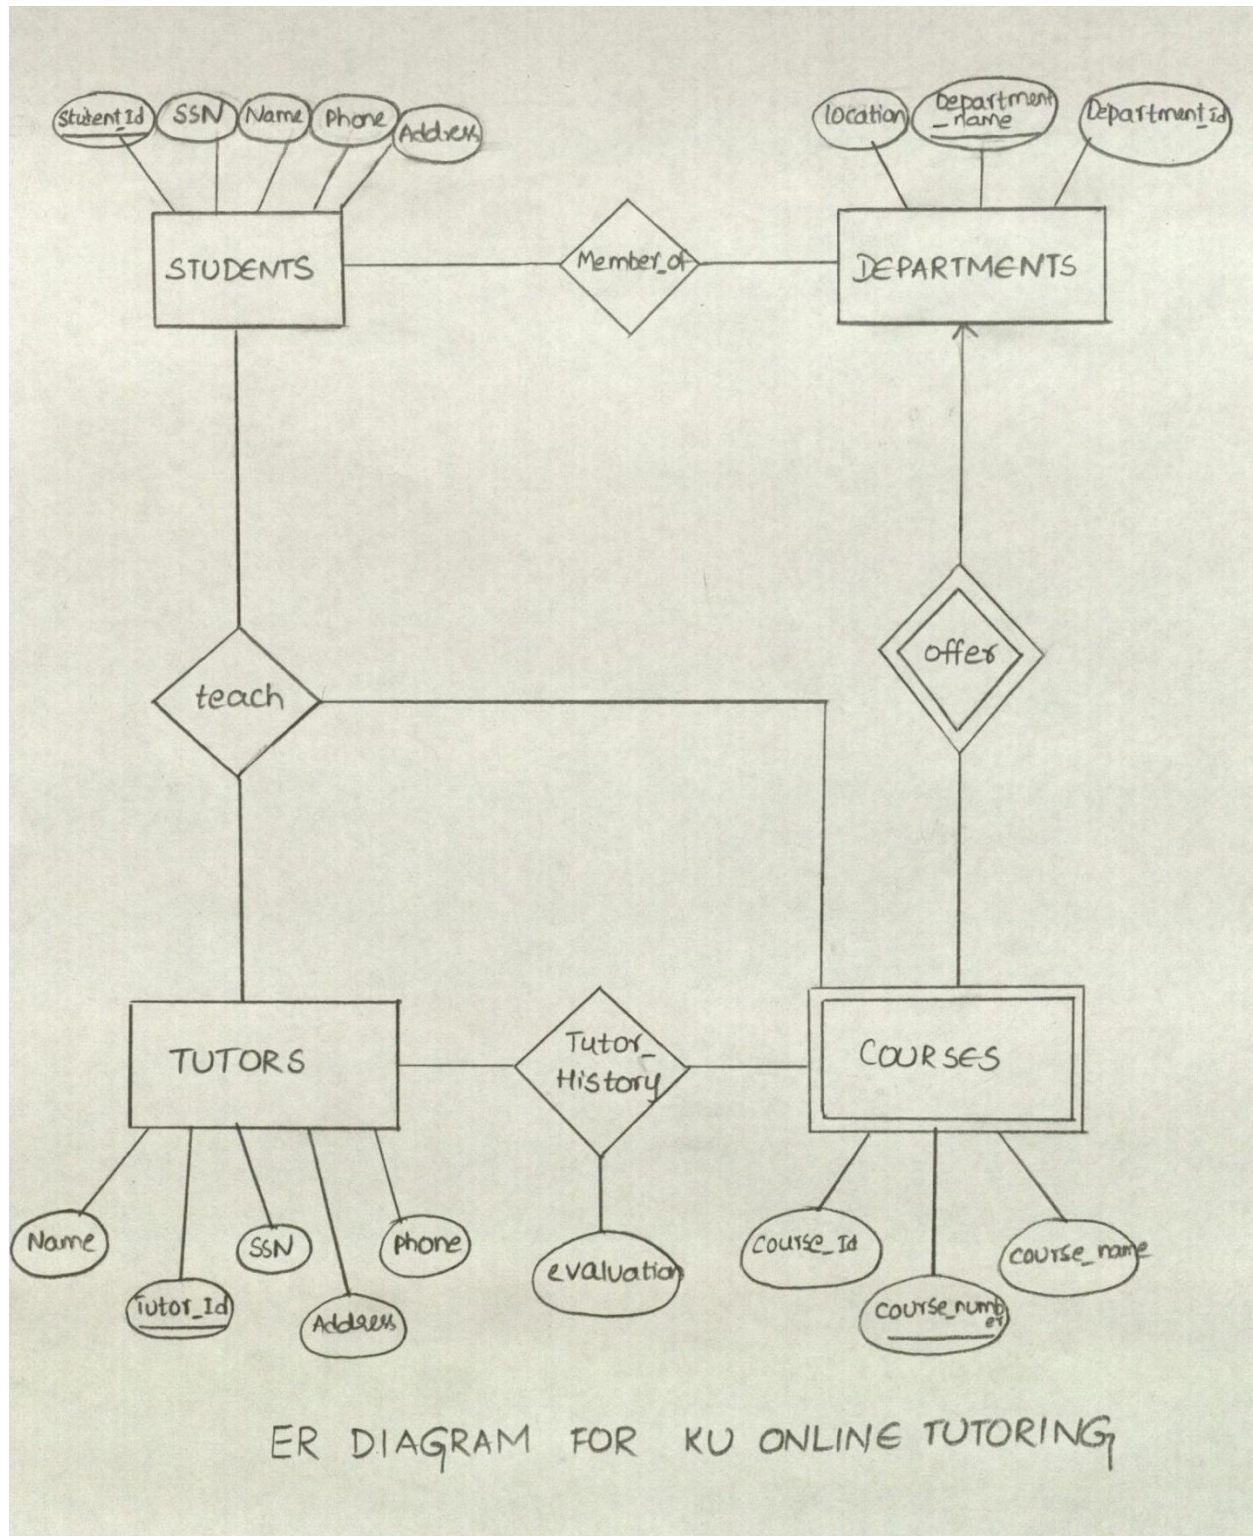

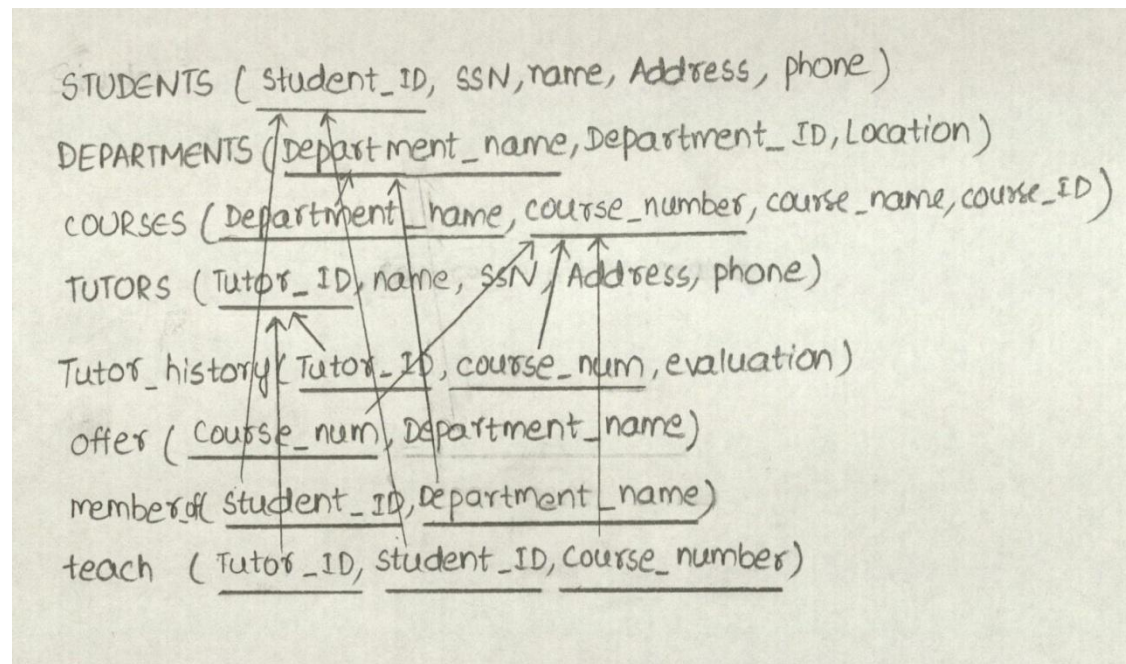

Technology Stack:

Business Logic and Frontend: PHP

Web server: PHP

Database: MySQL

ER DIAGRAM

LOGICAL DATABASE DESIGN**IMPLEMENTATION:**

The project is implemented using PHP and MYSQL. The front end and the businesslogic will be implemented using PHP and MYSQL will be used for database related operations. Below are the key components in the project.

1) **STUDENTLOGINPAGE.php**: When a student want to choose a Tutor,he/she should enter their name and KU ID in order to login into “KU ONLINE TUTOR SELECTION WEBSITE”.

The screenshot shows a web browser window with the URL <http://people.eecs.ku.edu/~mdoddala/loginpage.php>. The page has a blue header with the text "WELCOME TO ASPIRING KU STUDENTS!". Below the header is a black background featuring the KU Jayhawk mascot logo. On the left side, there is a login form with the following fields:

- STUDENTNAME**: A text input field containing the name "KATIE".
- KUID**: A text input field containing the KU ID "2787870".
- submit**: A button to submit the login information.

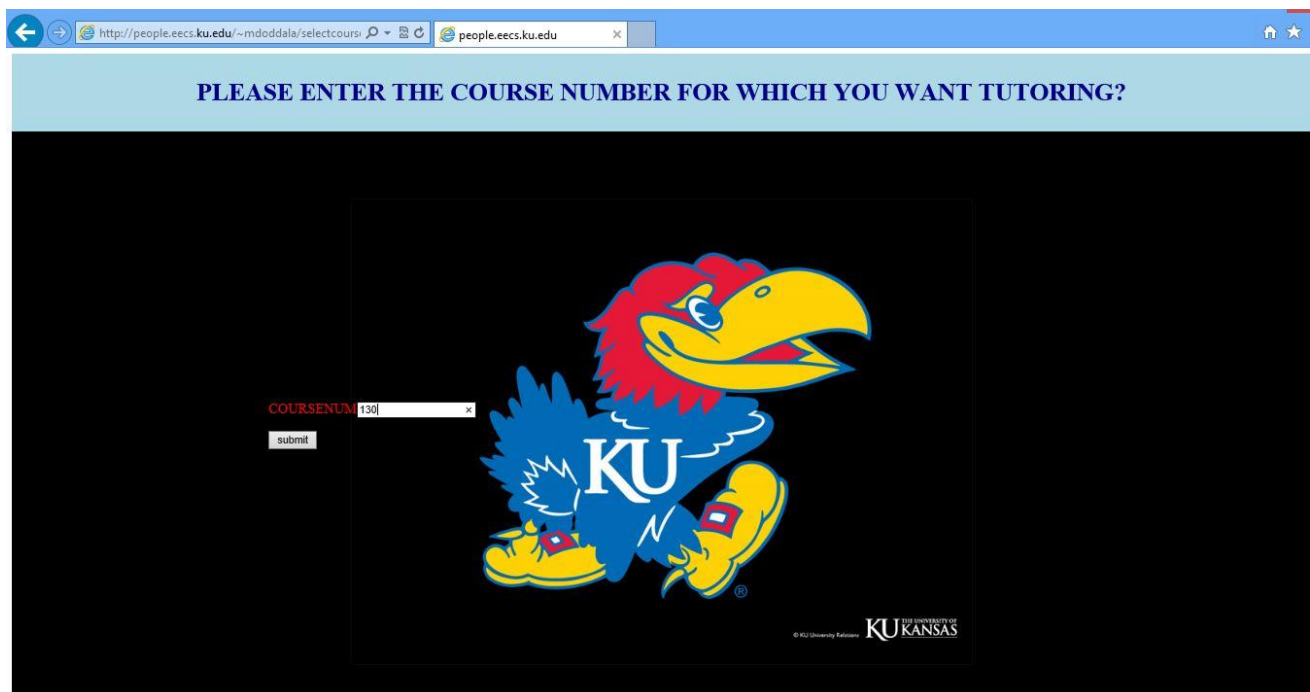

At the bottom right of the page, there is a small logo for the University of Kansas.

In case, any of the student provides wrong student Name or KU ID, The student will be redirected to same login page again so that he/she can enter it correctly again.

2) [SELECT_DEPT.php](#): Once the student gives his/her login details, All the departments stored in the database will be displayed, and among those the student should select one department in this page.

3) [SELECT_COURSE.php](#): Once student selects the department in previous page, Student can enter a course for which he/she want tutoring for.

If the student enters the course for which tutors are not available, It shows a message that "Tutors are not available for that course".

If the tutors are available for the course entered, in next page all the Tutors who are willing to tutor that course will be displayed.

4) **TUTOR.php**: All the tutors who can tutor the course selected by student will be displayed in this page and if a student selects one particular tutor, then the student will get assigned to that tutor.

The student is free to select a tutor of his choice depending on the Tutor's accent. If student enters a wrong tutor name, A message will be displayed.

5) **CONFIRM.php**: If the student enters Tutor name correctly from the listed tutors, he/she will be directed to a confirmation page where the student is assigned to a tutor along with department name and course number.

APPENDIX

TABLES:**1)STUDENTTABLE:**

Database management interface showing the results of a query on the STUDENT table.

Showing rows 0 - 4 (~5 total), Query took 0.0009 sec

```
SELECT *
FROM 'STUDENT'
LIMIT 0, 30
```

Profiling [Inline] [Edit] [Explain SQL] [Create PHP Code] [Refresh]

Show: 30 row(s) starting from row # 0 in horizontal mode and repeat headers after 100 cells

Sort by key: None

+ Options

	STUDENT_NAME	KU_ID
<input type="checkbox"/> Edit Inline Edit Copy Delete	JORDAN	2134528
<input type="checkbox"/> Edit Inline Edit Copy Delete	MILLER	2674532
<input type="checkbox"/> Edit Inline Edit Copy Delete	SRIMAN	2769403
<input type="checkbox"/> Edit Inline Edit Copy Delete	ALEX	2781345
<input type="checkbox"/> Edit Inline Edit Copy Delete	KATIE	2787070

2)DEPARTMENTTABLE:

Database management interface showing the results of a query on the DEPARTMENT table.

Showing rows 0 - 3 (~4 total), Query took 0.0009 sec

```
SELECT *
FROM 'DEPARTMENT'
LIMIT 0, 30
```

Profiling [Inline] [Edit] [Explain SQL] [Create PHP Code] [Refresh]

Show: 30 row(s) starting from row # 0 in horizontal mode and repeat headers after 100 cells

Sort by key: None

+ Options

CONCLUSION

The KU Online tutoring service helps many students to get connected with a tutor by which students end up getting good grades.

Students can search for courses online through this website and select a particular department, then the courses that are offered by that department are listed. Upon selecting a particular course, tutors who are capable of teaching that course will be listed, then the student can select a particular tutor and he/she will be assigned to that particular student.

Also With the help of online tutoring websites, Students can get help from tutors regarding their Assignments, quizzes, Exams.

FUTURE IMPROVEMENTS

PEER TUTORING - This Online Tutoring service can be extended and implemented for a group of peers also, by which a tutor can mentor some small number of students at a time.
